

Module: Electronics, system components

Series of TD n° 2

Exercise 1:

- 1) Which electronic component characterizes each of the four generations of computing machines?
- 2) Give the characteristics of each generation of computing machines as well as an example of machines for each of these four generations?

Exercise 2:

- 1) What are the three criteria seen in the course for classifying computers?
- 2) Name the three types of computer seen during the course? Briefly define each of them?
- 3) Draw a comparative table between the five types of microcomputer studied according to power, autonomy, price, volume and portability.

N.B: Computers will be rated from 1 to 5 (5 for the best) according to power, volume, battery life, price and portability.

Exercise 3:

1) What does the acronym ENIAC mean?

- (a) Electrical Number Integrator and Converter
- (b) Electronic Numerical Integrator and Computer
- (c) Electrical Numerical Inverter and Calculator
- (d) Electrical Number Inverted and Converter

3) Which of the following components are large, slow, and suffer from heat and maintenance issues?

- (a) Transistors
- (b) Vacuum tubes
- (c) Integrated circuits
- (d) Microprocessors

5) Which of the following computers are expensive and can process billions of instructions per second?

- (a) Supercomputers
- (b) Laptops
- (c) Hybrid computers
- (d) No response

2) ENIAC was:

- (a) Electronic computer
- (b) A device
- (c) A storage device
- (d) An electronic calculator

4) Which of the following technologies was used by the third generation of computers?

- (a) Transistors
- (b) Vacuum tubes
- (c) Integrated circuits
- (d) Microprocessors

6) What do you call a computer that works with binary digits 0 and 1?

- (a) Digital
- (b) Hybrid
- (c) Analog
- (d) No response

7) Which of the following is called a handheld computer?

- (a) Portable Digital Assistants (PDAs)
- (b) Personal Digital Assistants (PDAs)
- (c) Personal Digital Applications (PDAs)
- (d) All answers

9) Which device is used as a standard pointing device in a graphical user environment?

- (a) Keyboard
- (b) Mouse
- (c) Joystick

8) What are the essential components of a computer?

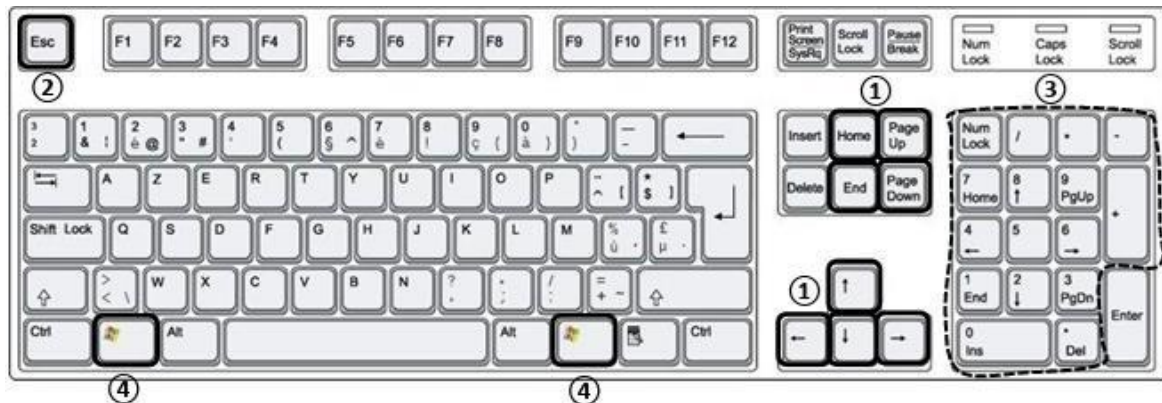

- (a) A microprocessor
- (b) Loudspeakers
- (c) Peripheral units

10) Computer software can be defined as

- (a) The computer and its associated equipment
- (b) Instructions that tell the computer what to do
- (c) Computer components that act to achieve a goal
- (d) An interface between the computer and the network

Exercise 4:

A keyboard is an essential input device for the computer, which allows commands to be sent to the computer:

- 1) What are the function keys?
- 2) What are the delete keys?
- 3) What are the input keys?
- 4) What are tab keys?
- 5) What are the key groups' ①, ②, ③ and ④ called?

Exercise 5:

1).....tells the computer how to use its components

- (a) Operating system
- (b) Utility
- (c) Network
- (d) Application software

2) The physical parts that make up your computer are called

- (a) Operating systems
- (b) Software
- (c) Hardware
- (d) Web browsers

3) Computers use number systems to store data and perform calculations

- (a) Binary
- (b) Octal
- (c) Decimal
- (d) Hexadecimal

4) is an electronic device that processes data and converts it into information

- (a) Computer
- (b) Processor
- (c) Stylus
- (d) Tower

5) is processed by the computer to extract the information

- (a) Numbers
- (b) Data
- (c) Pictures
- (d) No response

7) Which of the following statements is true?

- (a) The minicomputer runs faster than the microcomputer
- (b) The microcomputer works faster than the minicomputer
- (c) The speed of both computers is the same
- (d) The speed of these two computers cannot be compared with the speed of technology

9) Give the term intruder

- (a) Internet
- (b) Linux
- (c) Unix
- (d) Windows

6) of a system includes the instructions or programs

- (a) Hardware
- (b) Icon
- (c) Information
- (d) Software

8) Which of the following terms is not an operating system?

- (a) Windows 98
- (b) unix BSD
- (c) Microsoft office xp
- (d) Red Hat UNIX

10) The flashing symbol on the computer screen is called:

- (a) Mouse
- (b) Cursor
- (c) Logo
- (d) Index

Exercise 6:

1. Identify the various input/output connectors on the following rear panel:
