

Module: Electronics, system components

Series of TD n° 5

Exercise 1: Give the correct answer (a,b,c or d)

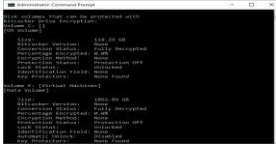

1. Software is a series of _____ that tells a computer what tasks to perform and how to perform them.
 - a. data
 - b. information
 - c. instruction
 - d. utility
2. _____ programs that control or maintain the operations of the computer and its devices.
 - a. Software
 - b. System Software
 - c. Application software
 - d. Utility program
3. _____ are programs that designed to help users to be more productive with their personal tasks.
 - a. Software
 - b. System Software
 - c. Application software
 - d. Utility program
4. Function of system software is to serve as the _____ between the user, the application software, and the computer's hardware
 - a. interface
 - b. program
 - c. application
 - d. server
5. There are three(3) types of system software
 - a. True
 - b. False
6. _____ a set of programs containing instructions that work together to coordinate all the activities among computer hardware resources
 - a. Operating system
 - b. System Software
 - c. Application software
 - d. Utility program
7. _____ is a complete operating system that works on a desktop computer, notebook computer, or mobile computing device.
 - a. Stand-alone OS
 - b. Server OS
 - c. Mobile OS
 - d. Free OS
8. _____ is an operating system that is designed specifically to support a network.
 - a. Stand-alone OS
 - b. Server OS
 - c. Mobile OS
 - d. Free OS

9. The picture shows a type of user interface as a function of operating system

- a. Command Line
- b. Graphical user interface

10. The picture shows a type of user interface as a function of operating system

- a. Command line
- b. Graphical user interface

11. What is information?

- a. hardware and electronics
- b. software and hardware
- c. hard drive, processor
- d. (or data) in paper or electronic format

12. Name this Logo

- a. Windows
- b. Google
- c. Yahoo

13. A Browser is an example of a software program or application.

- a. True
- b. False

14. The 2 types of Software are:

- a. Operating System
- b. System
- c. Business
- d. Application

15. What does the Internet prefix WWW stand for?

- a. Western Washington World
- b. Wide Width Wickets
- c. Word Wide Web
- e. Worldwide Weather

16. Who founded Apple Computer?

- a. Steve Jobs
- b. Steven Fry
- c. Bill Gates
- d. Steve Wozniak AKA THE Great and Powerful Woz

17. The CPU is the.of the computer.

- a. Knee
- b. Brain
- c. Body
- d. Heart

18. A list of options a user can choose from is a....
- list
 - tab
 - menu
 - form
19. System Software:
- Consists of the operating System.
 - Performs a useful function.
 - Is the outside of the computer.
 - Controls the computer.
20. Types of operating systems:
- Unix
 - Windows
 - Linux
 - Business
 - Robotics
21. The following is not a function of an operating system:
- Checking for viruses.
 - Directing information from peripheral devices like a mouse or a printer.
 - Allowing users to open applications.
 - Allocating the computer's memory between different tasks.
22. Operating systems are responsible for logging users in and out. This function is a part of:
- memory management
 - managing hardware and devices
 - user interface
23. Many operating systems have similar looking user interfaces featuring buttons, labels, and windows.
- False
 - True
24. _____are programs that designed to help users to be more productive with their personal tasks.
- Software
 - System Software
 - Application software
 - Utility program
25. The term OS is short for?
- Apple
 - Operating Software
 - Operating System
 - Overload System
26. If you want to record on the paper of what you are doing, you'll need a_____.
- calculator
 - monitor
 - keyboard
 - printer
27. Which of the following in not an Operating System?
- Mac OS
 - Windows Explorer
 - Red Hat
 - Solaris
28. Which of the following is not a product of Microsoft?
- Ubuntu
 - Xp
 - Vista
 - ME

3. What is an Operating System?
 - a. It is an interface between the user and the hardware
 - b. It is the first software that runs when the computer boots up
 - c. It provides a platforms for the user to run applications
 - d. All of the above
4. Which of the following is an example of Single Programming Operating System?
 - a. MS-DOS
 - b. Unix
 - c. Windows
 - d. Linux
5. Which of the following is not the function of Operating System?
 - a. Process Management
 - b. Memory Management
 - c. Device Management
 - d. Clock Management
6. A process is a
 - a. Operating system itself
 - b. A complete software package
 - c. Program in execution
 - d. Interrupt handler

Good luck
Dr. Nadjat Azzaoui
