

Module: Electronics, system components

Corrected Series of TD n° 4

Choose the right answer:

1. What does HDD MEAN?
 - b. Hard Disk Drive
2. The HHD is designed based on:
 - a. Mechanical components
3. What does the abbreviation SSD mean?
 - b. Solid State Drive
4. The SSD is designed based on:
 - b. Flash memory
5. What is the SATA connector for?
 - b. Allows you to connect storage devices (hard drives, CD/DVD drives) to a motherboard.
6. The DVI Connector
 - c. Allows you to connect a graphics card to a display device such as a computer monitor
7. Which of these connectors is a digital connector?
 - d. HDMI connector
8. An AGP port is slower than a PCI Express port
 - a. TRUE
9. The parallel port (DB25) is:
 - a. Port used to connect a printer (the other more recent and faster solution is USB)
10. A sound card is:
 - c. Input/output device
11. A scanner is:
 - a. Input device

Exercise 2:

Enter the correct answer (A, B, ..., E) in the "Answer" column for each of the questions (1, 2, ..., 5)

Motherboard I/O connectors	Answer
1. RJ45 connector	B
2. e-SATA connector	D
3. Display Port connector	E
4. Audio Connector	A
5. VGA connector	C

Possible answers
A. This connector is present on most sound cards and often on motherboards when the chipset manages the audio stream.
B. Allowing you to connect the computer to a network.
C. This type of connector is fitted to most graphics cards, allowing 3 analog signals corresponding to the red, blue and green components of the image to be sent to the screen.
D. Allowing the connection of storage devices.
E. The connector is a new digital interface allowing the transfer of multimedia data (digital audio and video).

Good Luck
